EXPERIENCE

SEMICOLON AFRICA, software engineer

- **Collaborated on a Blog Application:** focused on building the frontend while also developing the backend model, demonstrating my ability to work on both sides of the application development
- **Capstone Project: FitnessApp:** Developed a Django based fitness application in collaboration with a partner, contributing to the backend functionality, and independently created the mobile app using react native which is also nearing completion.
- **Personal Projects:** Currently working on a budgeting and saving mobile app, alongside password generator, both of which re nearing completion, showcasing my initiative and technical skills
